Nottingham Recovery Network Hospital Alcohol and Drug Liaison Service.

The Hospital Alcohol and Drug Liaison Team covers both the Queens Medical Centre and City Hospital sites in Nottingham. It provides a range of services for people who have been admitted to NUH for alcohol and drug related illnesses.

**Nottingham
Recovery
Network**

A range of services

The team of 3 band six specialists will be providing a range of services for patients and hospital staff to include:

- Screening and brief interventions using the AUDIT and SADQ screening tools
- Extended brief interventions on the NUH wards
- Advice regarding the medical management of withdrawal symptoms
- Referral to the Street Outreach team
- Liaison for patients already receiving drug or alcohol community treatment.
- Signposting or referral to the appropriate community treatment team
- Referral to homeless nursing team
- Assessment appointments with NRN in primary care setting for city patients
- Identification and Brief Advice training for staff.

The team will have an emphasis on reducing bed day times where appropriate and allowing people to continue their care in the community.
